Dear Hiring Manager,

I'm excited to be applying for the Lead Test Automation Engineer position at Billtrust. As someone who is highly focused and attentive to detail, I thrive on working with teams to create quality solutions for unique business problems.

During my previous roles, I was charged with developing quality assurance standards for a company where none existed and also was responsible to educate and enable team members on the best tooling to make their development life easier. I have also had a lot of experiences working on test automation for different software applications ranging from mobile and web.

I am also attentive to the need for continued process improvements. In my previous roles, I was always tasked with looking ahead and preparing what could be the next set of standards the company could adopt and work with the other members of the team to introduce these standards company-wide.

Thank you for your time and consideration. I'm looking forward to learning more details about the position advertised and I'm excited about the opportunity to leverage my unique range of skills and eager to contribute to your organization's continued success.

Sincerely,

Orandi Harris
